Dear Ms. Smith:

CALENDAR YEAR 2019 HANFORD FACILITY ANNUAL DANGEROUS WASTE REPORT AND HANFORD SITE WASTE TREATABILITY STUDIES REPORT

The Calendar Year (CY) 2019 Hanford Facility Annual Dangerous Waste Report (ADWR) has been prepared as required by Washington Administrative Code (WAC) 173-303-220, Generator Reporting, WAC 173-303-390, Facility Reporting, and Hanford Facility Resource Conservation and Recovery Act Permit Condition I.E.22, Annual Reporting. The report will be transmitted via the Internet to the TurboWaste.Net website by the March 1, 2020, due date.

The appropriate Site Identification, Off-Site Identification, Generation and Management, and Waste Received Forms were prepared for the four Site Identification numbers associated with Hanford Site waste management activities. The forms were included in the recent Turbo Waste.Net electronic file transmittals.

For record purposes, a compact disk copy of the CY 2019 Hanford Facility ADWR, DOE/RL-2020-12, Revision 0, is attached for your information (Attachment 1). Also, attached is a paper copy of DOE/RL-2020-13, Revision 0, Waste Treatability Studies Report (WTSR) for the Hanford Site, CY 2019 (Attachment 2). The WTSR is being transmitted pursuant to the WAC 173-303-071(3)(r) and (s).

If you have any questions, please contact me, or your staff may contact Brian J. Stickney, Assistant Manager for Safety and Environment, Richland Operations Office, on (509) 376-9079.

EXECUTIVE SUMMARY

The Annual Dangerous Waste Report (ADWR) is prepared to meet the requirements of Washington Administrative Code Sections 173-303-220, "Generator Reporting," and 173-303-390, "Facility Reporting." In addition, the ADWR is required to meet Hanford Facility Resource Conservation and Recovery Act of 1976 (RCRA) Permit Condition I.E.22, "Annual Report."

The ADWR is submitted to the Washington State Department of Ecology (Ecology) by March 1st (Annually). The ADWR provides information on dangerous waste generation and management activities for the following U.S. Department of Energy (DOE) Hanford Site locations and U.S. Environmental Protection Agency/state Identification Numbers:

Address:	**NAICS Code:**	**Identification Number:**
Hanford Facility	562211	WA7890008967
2355 Stevens Drive	493110	WAH000009159
825 Jadwin Ave, Federal Bldg	924110	WAR000010975
1030 Battelle Blvd	493110	WAH000048800

The report is comprised of forms that are completed following instruction published by Ecology. A brief overview of the forms is provided below:

Site ID Form: Provides the most recent location, contact information, and generator status. Also identifies the types of waste management activities performed.

Generation & Management Form: Provides detailed information about generated waste streams (e.g., waste codes, quantities, treatment/disposal methods, etc.)

Off-Site Identification Form: Provides the name, address, and RCRA Site ID Number(s) of dangerous waste handlers that Hanford contractors interacted with when sending waste off-site or when receiving waste from off-site.

Waste Received Form: Provides information about how Hanford contractors managed waste streams received from off-site.

The DOE officially transmits the ADWR electronically using the TurboWaste.net web site maintained by Ecology. In addition to the electronic report, the DOE also transmits a single follow-up hard copy report containing data for each of the Site Identification Numbers above.

- The total quantity of waste in storage each day
- The quantity and types of waste subjected to treatability studies
- When each treatability study was conducted
- The final disposition of residues and unused sample from each treatability study
- Estimation of the number of studies and the amount of waste expected to be used in treatability studies during the current year.

DATA

During CY 2019, Hanford Site workers engaged in activities subject to treatability study reporting requirements. Tables 1, 2, and 3 provide information called for under WAC 173-303-071(3)(r) and WAC 173-303-071(3)(s).
