CH2M HILL Plateau Remediation Company
2420 Stevens Center Place
P.O. Box 1600
Richland, WA 99352
Attn.: Tracey A. Burch

Subject: Geotechniocal Laboratory Testing Services, Data Deliverable for SDG #W603105, Rev. 1

Enclosed is the final report on geotechnical analyses performed by RJ Lee Group in conjunction with PBS Engineering and Environmental, Inc. (PBS) for Sample Delivery Group number (SDG #) W603105.

General Set Comments
RJ Lee Group received from CH2M-Hill Plateau Remediation Company (CHPRC) 1 sample to be tested for geotechnical analysis at the Columbia Basin Analytical Laboratories. There are no SIRs associated with this SDG.

The CHPRC sample, in SDG # W603105, has been assigned a PBS Geotechnical Lab Sample number per the below table.

CHPRC Sample #	SDG #	Geotechnical Lab Sample #
B354J9	W603105	H-0056

This project deliverable, provided in Attachment 1, contains the reports of the requested analytical results and a copy of the associated chain of custody for the sample listed above.

This revision is based on the inconsistency in reporting as described in the attached P&D report: the moisture content was determined by ASTM D2216.

The analytical results provided in this deliverable relate only to the items tested. The sample was received in acceptable condition unless otherwise noted in the attached report(s).

I certify that this analytical report is in compliance with the Hanford SOW, both technically and for completeness. Release of the data contained in this hard copy report has been authorized by the Laboratory Director or a designee as verified by the following signature.

Problem and Discrepancy Report

RJLee

SDG W603105

05/31/16

The data package has the following issues:

The COC request moisture content by ASTM D2216. Neither the RJLee case narrative nor PBS narrative make mention of the method use for determination of the moisture content however a result is reported. It is unclear if D2216 or D2937 was run to determine moisture content. This needs to be clarified in this report.

Resolution: *Revise narrative to include method reference for the moisture content determination.*

Lab Response:

The issue is corrected in the RJ Lee case narrative and resubmited.

Re: Geotechnical Laboratory Testing Results
Sample Delivery Group No. W603105
PBS Project No. 63737.000

Dear Mr. Lockrem:

In accordance with your request, PBS Engineering and Environmental Inc. (PBS) is providing you with the results of our recent geotechnical laboratory testing. Our services were provided in accordance with the request provided with Sample Delivery Group (SDG) number W603105.

We performed the following test:

- Density of Soil in Place by the Drive-Cylinder Method (ASTM D2937)

The test was performed in general accordance with the above-mentioned ASTM Standard.

We trust this letter meets your current needs. If you have any questions, or wish to further discuss our observations, conclusions, and recommendations, please contact us at 509.942.1600.

Sincerely,
PBS Engineering and Environmental, Inc.

5/12/2016

Adam M. Swenson, P.E.
Project Geotechnical Engineer

REPORT OF LABORATORY TESTING

Report to:	CH2M-Hill - Plateau Remediation 2420 Stevens Center Place P.O. Box 1600 Richland, WA 99352	**Date:** **Sample Delivery Group No.:** **Sample Authorization No.:**	5/11/2016 W603105 F15-028
Project:	CHPRC Laboratory	**Project No.:**	63797.000
Report of:	Density by Drive Cylinder (ASTM D2937)	**Lab Technician:**	A. Jaimes

Items Received:
One sample was provided to us containing soil material obtained by you, the client.
PBS performed the following test:

Density by Drive Cylinder (ASTM D2937).
The dry densities (dry unit weight) of representative soils were determined in the laboratory using the relatively undisturbed soil samples. The dimensions of the specimen were carefully measured, the volume calculated, and the specimen weighed. A representative sample was obtained from the specimen, weighed, and placed in the oven to dry. After oven drying, the representative sample was reweighed and the water content calculated. The dry density was then computed. The results of tests, including moisture, wet density, and dry density are included in the table below.

LABORATORY TEST RESULTS

Density by Drive Cylinder (ASTM D2937)

Customer Sample Number	Laboratory Sample Number	Wet Density (lbs/ft^3)	Water Content (%)	Dry Density (lbs/ft^3)
B354J9	H-0056	112.5	12.3	100.2
