ENVIRONMENTAL PROTECTION AGENCY

Dear Mr. Faulk,

This is in response to the request for public comment on the 100-BC-1 Demonstration Project Expedited Response Action.

I favor Alternative 2. I believe it's important to clean up the 100 Areas along the Columbia River as soon as practicable. It's an added bonus that Alt. 2 would also provide a way to collect information that will be useful in remedial design and remedial action of other parts of the site.

Most people don't understand why these cleanups take so long, so if you can start in on an area that concerns people and get something accomplished, I think a lot of people will be happier!

Yours,
R. G. Peterson
