**Subject:** RE: 100-H-36 Results Summary

Unfortunately the attached evaluation of the 100-H-36 waste site did not get memorialized into the UMM meeting minutes as was planned.

Please respond with your agreement and I will have it entered into the AR. It will also be included in the September UMM meeting minutes.

Thank you,

*John Neath*

**Subject:** RE: 100-H-36 Results Summary

Jason,

Thank you, the summary captures what we discussed well. We don't have further questions and you can proceed with the revised package.

Thanks,

Brian

**Subject:** 100-H-36 Results Summary

John, Alicia, & Brian-

Per our discussion on May 26, we've revised the 100-H-36 package to remove the interim site reclassification elements. My understanding was that this revised package would be memorialized by including as a UMM attachment. Please let me know if you have any questions or if there's anything else I may be able to provide.

Thanks again for the direct discussion on this one as well,

Jason
