 238816
 238817

This letter transmits the subject documents to the Washington State Department of Ecology (Ecology) and U.S. Environmental Protection Agency (EPA) for information.

These documents are the culmination of the effort to separate the 100-HR-3 Operable Unit CERCLA documents from the combined 100-KR-4 and 100-HR-3 Operable Unit CERCLA documents. This was performed using the rationale that the future CERCLA Proposed Plans and Records of Decision will be developed as integrated soils and groundwater remediation decisions and plans specific to applicable groundwater operable units. In addition to the benefits of soils and groundwater integration, this action will enhance the transition from interim documents to final documents.

My staff has worked closely with Rod Lobos of EPA, and Alicia Boyd, Nina Menard, Robin Varljen, Dwayne Crumpler, and Brian Johnson of Ecology to create these products.
