FAST FLUX TEST FACILITY
Project Managers Meeting Minutes
825 Jadwin/Room 540S/700 Area
Richland, Washington

May 28, 2015

- I. The August 28, 2014, FFTF Project Managers Meeting (PMM) minutes were approved by RL and Ecology representatives and submitted to the Administrative Record (AR). No FFTF PMMs were held September 2014 through April 2015. The April PMMs were canceled per RL and Ecology representative agreement.

- II. Status Report
 - A. Darin Corriell (CHPRC) provided a status report for FFTF, noting that the facility is not operating. Mr. Corriell stated that there is a water system and a sewer system in operation for the temporary occupants. Mr. Corriell reported that a surveillance of the 400 Area Waste Management Unit (WMU) was conducted in the March 2015 time frame, and there were no changes noted in the facility since the surveillance done last year. Mr. Corriell added that there is a minor issue with a large tumbleweed buildup. The fire water tanks are being inspected, and a report will be issued. Mr. Corriell stated that the only other activities are basic surveillance and maintenance to ensure the fans are running and the lights are working. Michael Turner (MSA) inquired about the full-time staff. Mr. Corriell responded that, from a surveillance and maintenance perspective, there are no full-time staff since it is an unoccupied facility, and the weekly inspections are conducted by staff housed in the 200 East Area who travel out to the 400 Area WMU. Al Farabee (RL) asked if a log is still maintained in the pump house. Mr. Corriell responded that the water system is managed by the CHPRC water purveyor, who is located in the 100 Area and maintains a log on the daily checks that are required. Mr. Corriell noted that a water system is needed to maintain the fire system in the area. Mr. Farabee added that there is a permitted process sewer system that receives condensate from the air compressor at the Maintenance and Storage Facility (MASF).

- III. Status of Previous Agreements and Commitments
 - A. There were no previous agreements or commitments.

- IV. New Agreements and Commitments
 - A. There were no previous agreements or commitments to discuss.

- V. Near Term Schedules and Ongoing Activities (Milestones)
 - A. M-092-09

Mr. Farabee stated that M-092-09 is the milestone to define milestones for a sodium reaction facility for the sodium in the 400 Area when it is needed for the Waste Treatment Plant (WTP). Mr. Engelmann added that the milestone is to establish a milestone by 2018. Mr. Farabee agreed, stating that there is no current activity under the milestone.

 - B. 400 Area Waste Management Unit Status

Mr. Engelmann stated that Mr. Corriell addressed the 400 Area WMU under the status report. Mike Collins (RL) stated that RL does not intend to remove the 19 containers from the interim storage area (ISA) pad or the two boxes from the Fuel Storage Facility (FSF).

Stacy Nichols (Ecology) indicated that Ecology's position is that the containers and boxes should be removed. Mr. Farabee stated that the issue is raised every year or two by Ecology's compliance team, and RL/CHPRC prepared a cost pay-back calculation on the subject that has been transmitted to Ecology. Mr. Engelmann added that removal of the containers and boxes was noted in the last inspection report, and that the last formal correspondence from RL to Ecology was in the August 2014 time frame, with no response from Ecology. Mr. Collins noted that removal of the containers and boxes also shows up in the dangerous waste report.

- VI. Approved Changes Signed Off in Accordance with TPA Section 12.2
 - A. There were no approved changes to sign.
- VII. General Discussion
 - A. There were no topics raised for general discussion.
- VIII. Actions
 - A. There were no actions identified.
- IX. Documents for the Administrative Record
 - A. There were no documents identified for submittal to the AR. The meeting minutes from today's meeting will be submitted to the AR.
- X. Next Project Managers Meeting
 - A. The next PMM was scheduled for October 22, 2015.
