<b>Description of Change:</b> This change is an update to Figure AD1-14, 216-A-30 Crib Data Collection Locations which is page AD 1-35 of the document.			
The revised location of the subject borehole is as depicted in the Attachment 1 figure.			
<p><u>B. d. Charbonneau</u> and <u>Craig Cameron</u> agree that the proposed change modifies an approved  <u>M.S. McCormick</u> <u>RL</u> <u>Lead Regulatory Agency</u></p> <p>Workplan/document and will be processed in accordance with the Tri-Party Agreement Action Plan, Section 9.0, <i>Documentation and Records</i>, and not Chapter 12.0, <i>Changes to the Agreement</i>.</p>			
<b>Justification and Impacts of Change:</b> During the development of the Supplemental Remedial Investigation/Feasibility Study Work Plan for the 200 Area Central Plateau Operable Units, locations for the site-specific characterization needs, including boreholes, were discussed among the Tri-Parties. The Tri-Parties also discussed and agreed that changes to the sampling locations may occur as new information becomes available, such as the results of electrical resistivity data. Based on the review of the electrical resistivity characterization results, there is an area of high conductivity that is desirable to sample to determine correlation of sample data with electrical resistivity data. This change in borehole location will support this effort. This change has no impact on completed or ongoing activities.
