Re: Extension Request for Response to Notice of Correction for the Operation of Diesel Engines at the Hanford 336 Building and Assurance of Discontinuance

Dear Mr. Brockman:

On January 9, 2008, the Department of Ecology issued a Notice of Correction to the United States Department of Energy – Richland Operations Office (USDOE-RL) (Reference 1). The Notice was issued in order to assure that USDOE-RL operates within permit conditions established under Order DE06NWP-002. By Reference 2, USDOE requests a 45-day extension to complete the actions required by the Notice of Correction.

We reviewed your request and grant your requested 45-day extension. We expect your completion of Notice actions by June 23, 2008.

If you have any questions, please contact Oliver Wang at 509-372-7932.

Sincerely,

Ron Skinnarland
Waste Management Section Manager
Nuclear Waste Program
