

### Waste Site Reclassification Form

<b>Date Submitted:</b> 02/11/2008	<b>Operable Units:</b> 200-SW-1	<b>Control Number:</b> 2008-013
<b>Originator:</b> Greg Berlin	<b>Waste Site ID:</b> 200-W-41	
<b>Phone:</b> 376-2389	<b>Type of Reclassification Action:</b>	
	Closed Out: <input type="checkbox"/>	Interim Closed Out: <input type="checkbox"/>
	No Action: <input type="checkbox"/>	RCRA Postclosure: <input type="checkbox"/>
	Rejected: <input checked="" type="checkbox"/>	Consolidated: <input type="checkbox"/>

This form documents agreement among parties listed authorizing classification of the subject unit as Closed Out, Interim Closed Out, No Action, RCRA Postclosure, Rejected, or Consolidated. This form also authorizes backfill of the waste management unit, if appropriate, for Closed Out and Interim Closed out units. Final removal from the NPL of No Action and Closed Out waste management units will occur at a future date.

**Description of Current Waste Site Conditions:**

(Summarize status of investigation/remediation of the waste sites.)

The site was described as a single 190-liter (50-gallon) carbon tetrachloride drum and two 114-liter (30-gallon) Trysben (herbicide) drums found east of T Plant. The drums showed no evidence of contaminating the surrounding soil. A hole was observed near the bottom of the carbon tetrachloride drum. The 114-liter (30-gallon) Trysben weed killer drum was in good condition and was completely sealed. There was no soil discoloration, distressed vegetation or other evidence of material leakage at the site where the drums had been located.

**Basis for Reclassification:**

(For closeout, reference supporting documentation, as listed in Table 3.)

On September 27, 1999, the three drums were removed from the field. The drums were reviewed by a waste shipper who determined that no regulatory disposal requirements applied to these drums. The drums were crushed and placed in a dumpster. There was no soil discoloration, distressed vegetation or other evidence of material leakage at the site where the drums had been located. No soil samples were taken.

This site was originally reclassified to "No Action" on 5/6/2004. It is requested that the reclassification status be re-evaluated to a status of "Rejected". The Rejected status will preclude carrying the site forward through the CERCLA process.

**Waste Site Controls**

Engineered Controls: Yes  No  Institutional Controls: Yes  No  O&M requirements: Yes  No

If any of the Waste Site Controls are checked Yes specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents.

None required.
