<p>This form documents agreement among parties listed authorizing classification of the subject unit as Closed Out, Interim Closed Out, No Action, RCRA Postclosure, Rejected, or Consolidated. This form also authorizes backfill of the waste management unit, if appropriate, for Closed Out and Interim Closed out units. Final removal from the NPL of No Action and Closed Out waste management units will occur at a future date.</p>		
<p>Description of Current Waste Site Conditions: (Summarize status of investigation/remediation of the waste sites.) The unit is a deep pit with steep sloped sides. It is surrounded with a light chain and posted with "Danger-Open Pit" signs. A thin layer of ash remains on the floor of the pit.</p> <p>Basis for Reclassification: (For closeout, reference supporting documentation, as listed in Table 3.) A waste determination of the Hanford Site 200 Area steam plant ash was performed in the early 1990s. Samples were analyzed using the TCLP (Toxicity Characteristic Leaching Procedure), and all were below the regulatory limits. The pH of the samples averaged 9.27, with a range of 7.66 to 11.91. The waste stream was determined to be nondangerous.</p> <p>This site was originally reclassified to "No Action" on 5/6/2004. It is requested that the reclassification status be re-evaluated to a status of "Rejected". The Rejected status will preclude carrying the site forward through the CERCLA process.</p> <p>Waste Site Controls Engineered Controls: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Institutional Controls: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> O&M requirements: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> If any of the Waste Site Controls are checked Yes specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents.
