This form documents agreement among parties listed authorizing classification of the subject unit as Closed Out, Interim Closed Out, No Action, RCRA Postclosure, Rejected, or Consolidated. This form also authorizes backfill of the waste management unit, if appropriate, for Closed Out and Interim Closed Out units. Final removal from the NPL of No Action and Closed Out waste management units will occur at a future date.

Description of Current Waste Site Conditions:

(Summarize status of investigation/remediation of the waste sites.)

The Hanford Site Waste Management Units Report (1987) states that in 1986, a diesel compressor overflowed releasing approximately 76 liters (20 gallons) of diesel fuel to the ground. In 1986, the fuel was absorbed, cleaned up and drummed for disposal. The spill area is not marked or posted. The amount of diesel fuel released, 20 gallons, is less than the actionable quantity of 25 gallons, per WAC 173-360-385(3)(a). The spill was also cleaned up within a reasonable time period as required by the regulations. Therefore, no further action is required.

Reference WAC 173-360-385 -

(3) Owners and operators shall take appropriate action in accordance with WAC 173-360-399 in the following cases:

(a) A spill or overflow of petroleum that results in a release to the environment of less than twenty-five gallons or another reasonable amount specified by the department or delegated agency, if cleanup is not or cannot be accomplished within twenty-four hours or another reasonable time period established by the department or delegated agency;

Basis for Reclassification:

(For closeout, reference supporting documentation, as listed in Table 3.)

UPR-200-E-142 was reclassified to No Action in 2004. It is listed on Table A-2a, 200-UR-1 Operable Unit Waste Sites That are Identified as Rejected or No Action, DOE/RL-2004-39, Rev. 0, 200-UR-1 Unplanned Release Waste Group Operable Unit Remedial Investigation/Feasibility Study Work Plan. In 2007 the definitions for "Rejected" and "No Action" were revised. The classification of this site should be changed to "Rejected" to align with the revised definitions in the TPA-MP-14 procedure.
