This form documents agreement among parties listed authorizing classification of the subject unit as Closed Out, Interim Closed Out, No Action, RCRA Postclosure, Rejected, or Consolidated. This form also authorizes backfill of the waste management unit, if appropriate, for Closed Out and Interim Closed Out units. Final removal from the NPL of No Action and Closed Out waste management units will occur at a future date.

Description of Current Waste Site Conditions:

(Summarize status of investigation/remediation of the waste sites.)

On February 8, 1972, contamination was identified on the roadway near the intersection of Dayton Avenue and 13th Street. The most likely source of the contamination was dripping from an earlier transport of temperature probes from 241-SX Tank Farm to the burial ground. The roadway was barricaded, follow up surveys were made, and the vehicle and roadway were decontaminated in 1972. The Unplanned Release site is not physically marked or posted. Routine radiological surveys are done annually on the road surfaces inside 200 East and 200 West Areas.

Basis for Reclassification:

(For closeout, reference supporting documentation, as listed in Table 3.)

UPR-200-W-68 was Reclassified to No Action in 2004. This site is listed on Table A-2a, 200-UR-1 Operable Unit Waste Sites That are Identified as Rejected or No Action, DOE/RL-2004-39, Rev. 0, 200-UR-1 Unplanned Release Waste Group Operable Unit Remedial Investigation/Feasibility Study Work Plan. In 2007 the definitions for "Rejected" and "No Action" were revised. The classification of this site should be changed to "Rejected" to align with the revised definitions in the TPA-MP-14 procedure.
