Dear Gentlemen:

You are invited to attend a workshop to review the monitoring data from a remedial investigation at the US Ecology site at Hanford. The workshop will start at 9:00 a.m. on Tuesday, April 21, 2009, at Ecology's Nuclear Waste Program Office – 3100 Port of Benton Blvd., in Richland. US Ecology is conducting site characterization for a Remedial Investigation/Feasibility Study that is required by an agreed order under the Model Toxics Control Act. The study includes sampling and analyses for soil, groundwater, and soil gas vapor. The soil sampling and analysis is complete and the groundwater monitoring campaign is halfway done. Three quarters of soil gas vapor sampling and analysis is completed.

The workshop will present the data collected in the remedial investigation. The experts that collected and validated the data will be available. The data is available now for your review on Ecology's web site at <http://www.ecy.wa.gov/programs/nwp>.

Mr. Stuart Harris *et al.*
