March 26, 2009

- I. Approval of February 26, 2009 Purgewater Project Meeting Minutes (Ecolgoy/DOE/CHPRC).  
A. The PMM minutes were approved.

II. Operational Status

- A. Rick Oldham (CHPRC) reported that in February, 20,207 gallons of purgewater were sent to ETF, and 5,010 gallons of purgewater were sent to the modutanks. Operations is currently planning to decant the modutank as necessary to maintain the appropriate freeboard, and the submersible pump will be employed to knock down the mound that's in the northeast corner. The freeboard is currently at 1.33 feet, and it's estimated that the upper 18 inches of the sediment mound can be moved. With the warmer season approaching, evaporation will occur and eventually water will have to be added to the sediment.
