Re: Extension on EPA Review of "Remedial Investigation/Feasibility Study for the 200-MW-1 Miscellaneous Waste Sites Operable Unit," DOE/RL-228-38, Draft A

Dear Mr. Charboneau:

The subject document was received by the U.S. Environmental Protection Agency (EPA) for review on February 25, 2010. EPA is taking an extension of an additional 30 days beginning April 17 for review of this document. Because of other recent priorities, EPA needs more time to do a thorough review and to coordinate with the Washington State Department of Ecology, which is providing comments as the support agency.

If you have any questions, please contact me at (509)376-8665.

Sincerely,

A handwritten signature in cursive script that reads "Craig Cameron".
