

Meeting Minutes Transmittal

FFTF
 Project Managers Meeting
 825 Jadwin/Room 340
 Hanford, Washington
 April 29, 2010

The undersigned indicate by their signatures that these meeting minutes reflect the actual occurrences of the above dated Project Managers Meeting. Signatures denote concurrence with content only and are not intended to imply agreement to any commitments.

Frederick A. Bond

Project Manager, Ecology

Date: 7-22-10

D. H. Chapin

Project Manager Representative, RL

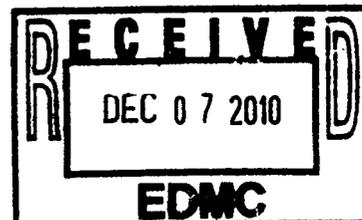

Date: 10/21/10

R. E. Piippo

Project Manager Representative, CHPRC

Date: 10/21/10

FFTF PROJECT MEETING MINUTES

Project Managers Meeting

825 Jadwin/Room 340/700 Area

Richland, Washington

April 29, 2010

- I. No FFTF Project Meeting Minutes to approve.
 - A. The last PMM was held September 24, 2009, and the meeting minutes were approved in October 2009. The Tri-Parties have agreed to meet every six months.

- II. Administrative Issues
 - A. State Wastewater Discharge Permit

Doug Chapin (RL) provided an update on the ST4501 state wastewater discharge permit. RL, Mission Support Alliance and Ecology have agreed to cancel the 4501 permit because the only discharges are from MASF. The discharges will be addressed under the miscellaneous waste discharge permit (ST 4511). Brian Dixon (CHPRC) stated that the 4501 permit has not yet been canceled and is still under the jurisdiction of PRC. Rick Bond (Ecology) inquired about the one-time discharge of 100,000 gallons out of MASF from K Basin testing. Mr. Chapin responded that it is covered under 4501, and it will go into the 4511 permit.

- III. Project Specific Issues
 - A. Dave Polzin (CHPRC) reported that the annual surveillance and maintenance (S&M) walk-around was recently completed, and a report is being drafted. Mr. Polzin stated that there were no findings, other than some roof leaks that are being repaired as part of routine maintenance.

Mr. Chapin reported that RL conducted a half-day walk-through, independent of CHPRC's S&M. Several empty drums were observed that were placed at strategic locations to collect roof leaks, and the question was raised about how the drums are tracked and maintained to ensure proper disposal of water and leakage. The drums are maintained once a year through the annual contractor S&M. Mr. Chapin stated that there was no further discussion regarding the drums. Some hoses and electrical cords were observed lying in an unsecured position on the east side door of 4717 Reactor Storage Building. Mr. Chapin noted that he drafted an Operational Assessment (OA) report on the walk-through, which he provided as information to Rick Bond (Ecology).
 - B. A biannual RCRA inspection is also done in compliance with the S&M plan. The inspection is to ensure there is no leakage out of the boxes stored in the Fuel Storage Facility (FSF). Mr. Polzin stated that pressure monitoring for all of the sodium-wetted components is located on the outside of the building on the dewar pad. A dewar is a large tank containing liquid argon. There are four dewars that can be operational, and one is in operation. The pressure monitoring goes into a panel in the 481 pump house, and if the pressure drops below a certain level an alarm is set to auto dial the SOE on site.
 - C. Mr. Polzin stated that responsibility for the 400 Area sanitary sewer has fallen under the S&M group. The sanitary feeds are mainly MASF and the buildings outside the FFTF Property Protection Area (PPA). Some of the buildings will be taken down, and the feeds into the sanitary sewer will be foamed shut or otherwise plugged. Mr. Polzin noted that several months ago the main water pump (P-16) failed, and it has not yet been repaired. One of two backup wells is being used, which has a higher tritium

level.

IV. Milestone Status

- A. Mr. Chapin stated that M-92-09 is the only milestone remaining, which is due September 30, 2018. The milestone is to establish milestones and/or target dates for acquisition of new facilities for the Hanford Site sodium. Mr. Chapin noted that the final Tank Closure and Waste Management EIS (TC&WM EIS) is scheduled for March 2011, and the ROD would be issued in April 2011 at the earliest. The public comment period on the tank TC&WM EIS has been completed and comments are under review.

V. New Topics

- A. There were no new topics to address.

VI. New Action Items

- A. There were no new action items.

VII. Documents for Submittal to the Administrative Record

- A. The OA report on the RL walk-through at FFTF was tentatively identified for submittal to the Administrative Record.

VIII. Next Project Managers Meeting

- A. The next meeting was scheduled for September 23, 2010 at 8:30 a.m.

FFTF PROJECT MEETING
825 Jadwin/Room 340
Hanford, Washington
April 29, 2010

8:30-9:00 am

Agenda

- I. No FFTF Project Meeting Minutes to approve
- II. Administrative Issues
- III. Project Specific Issues
- IV. Milestone Status
- V. New Topics
- VI. New Action Items
- VII. Documents for Submittal to the Administrative Record
- VIII. Next Project Managers Meeting
