3. Comment:

The 296-S-7 dual stacks were part of the demolished 233-SA building. The stacks were demolished in 2004, along with the 233-SA building. They were adjacent to the REDOX Canyon.

This waste site is being classified as Not Accepted because it does not meet the WIDS database scope, as described in Section 2.0 of TPA-MP-14, Rev. 2.

Section 2.0 states that WIDS does not document buildings or facilities that do not contain TSD units. It further states that, after buildings are demolished, the footprint will be evaluated for potential soil contamination. If present, the soil contamination will be added to WIDS as a Discovery Site.

A new Discovery Site has been created (200-W-253) for the footprint of the 233-S and 233-SA buildings.

4. Is the site a Solid Waste Management Unit?

Any discernible location at the Facility where solid wastes have been placed at any time, irrespective of whether the location was intended for the management of solid or dangerous waste, and includes any area at the Facility at which solid wastes have been routinely and systematically released (for example through spills), and includes dangerous waste treatment, storage, and disposal units.

 Yes No

5. Does the site need to be addressed under a regulatory program? Check first item that applies.
