

## WASTE SITE RECLASSIFICATION FORM

**Operable Unit:** 200-WA-1

**Control No.:** 2014-059

**Waste Site Code(s)/Subsite Code(s):**

UPR-200-W-165

**Reclassification Category:** Interim  Final 
**Reclassification Status:** Closed Out  No Action  Rejected   
 RCRA Postclosure  Consolidated  None 
**Approvals Needed:** DOE  Ecology  EPA 
**Description of current waste site condition:**

(What is the current physical state of the site? What activities have been performed?)

The site had been a large area of posted Surface Contamination Area resulting from migrating contaminated particles from the 241-S, SX, SY tank farms. Surface stabilization actions were taken in 1992. The contaminated soil was scraped and consolidated on the 216-S-9 and 216-S-23 Cribs. A total of 68 sample points were randomly selected from the scraped areas. After the sample results were reviewed, the area was released from radiological control using approved 1993 procedures (Westinghouse WHC-CM-7-5, Table 6-1).

**Basis for reclassification:**

(How does the site meet the reclassification status?)

Contaminated soils were scraped and consolidated on top of the 216-S-9 and 216-S-23 cribs in 1993. The scraped areas were sampled and released from radiological control in 1993 based on WHC-CM-7-5, Table 6-1 Inaccessible Soil Concentration Limits. It is recommended this site be reclassified to No Action because the contaminated soil was moved and radiological release met the standards of the time. The area was removed from radiological controls. The radiological postings were removed.

# WASTE SITE RECLASSIFICATION FORM

Operable Unit: 200-WA-1

Control No.: 2014-059

Waste Site Code(s)/Subsite Code(s):

UPR-200-W-165

**Project Manager comments:**

**Waste Site Controls:**

Engineered Controls:  Yes  No Institutional Controls:  Yes  No O&M Requirements:  Yes  No

If any of the Waste Site Controls are checked Yes, specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents:
