TREATABILITY TEST PLAN FOR THE 200-BP-5 GROUNDWATER OPERABLE UNIT,
DOE/RL-2010-74, REVISION 2, DRAFT A

This letter transmits the Treatability Test Plan (TTP) for the 200-BP-5 Groundwater Operable Unit, DOE/RL-2010-74, Revision 2, Draft A to the U.S. Environmental Protection Agency and Washington State Department of Ecology for review and comment. The purpose of this TTP is to evaluate the feasibility of using pump and treat technology as a remediation alternative for addressing groundwater contamination in the 200-BP-5 Operable Unit.

This treatability test plan revises a previously approved plan (DOE/RL-2010-74, Revision 1). This revised plan changes the treatment of groundwater extracted during the aquifer testing from the Environmental Treatment Facility (ETF) in 200 East to the 200 West Pump and Treat Facility in the 200-ZP-1 Operable Unit. Please provide your comments by March 31, 2015.
