

TWRS EIS COMMUNICATION RECORD

Date of meeting or telephone conversation
16 OCT 1995

Participants or Attendees (with organization):
Charlie Brandt, PNL

Subject(s) Discussed/Summary of Discussions:

We discussed the possibility of mitigation for the McGee Ranch. Charlie indicated that a partial loss of the ranch could be mitigated. If the western end of the ranch is left undisturbed and shrub-steppe vegetation is restored, partial mitigation would be accomplished. In order to meet the 3:1 replacement ratio specified in the Biological Resources Mitigation Strategy it would be necessary to restore other areas. The other corridor between YTC and Hanford is west of 24, part of the burned area on FEALE. This corridor is of less value because of the barrier the highway and its traffic create but, if restored, it would be of increased importance.

Issues/Concerns Identified (Unresolved questions):
None

Required actions:
None
