Mr. Steve M. Alexander
Perimeter Areas Section Manager
Nuclear Waste Program
State of Washington
Department of Ecology
1315 W. Fourth Avenue
Kennewick, Washington 99336-6018

Dear Mr. Alexander:

AGENDA FOR THE AUGUST 8, 1995, 100-D PONDS MEETING

Attached, please find the subject agenda. In keeping with discussions held August 2, 1995, between State of Washington, Department of Ecology (Ecology), and U.S. Department of Energy, Richland Operations Office (RL), staff, the proposed agenda is organized around providing a status of activities and issues, and developing a schedule for the next several months. The schedule would include the timing for resolving the Notice of Deficiency (NOD). It is anticipated that this schedule will likely extend beyond the 60 days outlined in the Hanford Federal Facility Agreement and Consent Order Process Flow Diagram (Figure 9-2) because new Unit Manager's have been assigned, Ecology has not finished their review of the Phase II data set, and the comments on the closure plan are very extensive. Once the NOD has been resolved the schedule can be set for revision of the closure plan.

RL is also recommending that this meeting be scheduled as a Unit Managers' Meeting since it has been several months since a Unit Managers' Meeting has been held for this unit. If you want to discuss this matter further or require additional information, please contact Ms. N. S. Kimball on 376-4670.

Sincerely,

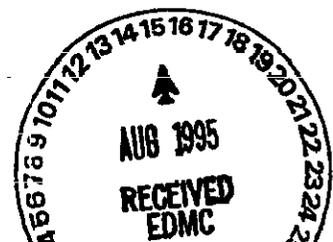

For Julie K. Erickson

Julie K. Erickson, Senior Project Manager
Remedial Action Project
