  - (2) DOE ltr. to Messrs. Alexander and Sherwood from Mr. Steven H. Wisness "Transmittal of DOE/RL-95-38 'Approach and Plan for Cleanup actions in the 100-FR-2 Operable Unit of the Hanford Site,' Draft A (Attachment 1) and Accompanying Fact Sheet (Attachment 2) for Review and Comment," dtd. March 31, 1995 40966

The recently approved Environmental Restoration Refocusing Change Requests to the Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement) established Milestone M-13-001, "Submit Planning Documentation Necessary to Complete the Remedial Investigation/Feasibility Study Process for 100-FR-2, 100-KR-2, and 100-KR-3," December 31, 1995. This milestone has been met with the submittals of DOE/RL-94-151 in January 1995 (Reference 1) and DOE/RL-95-38 in March 1995 (Reference 2). It should be noted that the Tri-Party Agreement Change Number M-15-94-11, "Consolidate Operable Units 100-KR-2 and 100-KR-3," eliminated the need for a separate action for the 100-KR-3 Operable Unit and it is now included in the 100-KR-2 Operable Unit. 40260

Since the submittal of DOE/RL-94-151 in January 1995, work has progressed to the point where the document has undergone public review and has been approved and released. DOE/RL-95-38 has been completed and undergone U.S. Department of Energy, Richland Operations Office, and regulator review. It was scheduled to begin public review in June 1995.
