Change Title

Listing of Suspect Sites, 100-IU-3 (Wahluke Slope) Operable Unit

Description/Justification of Change

This change request has been developed pursuant to the Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement), as amended. It addresses the 100-IU-3 (Wahluke Slope) Operable Unit, a subgroup of the Hanford Site 100 Area National Priority List aggregate area. The Tri-Party Agreement originally identified two units in the 100-IU-3 Operable Unit, the USBR 2, 4-D Burial Site and the Wahluke Slope NIKE Missile Base. The missile base is composed of two subsites, H-06C and H-06L. During the course of further site investigations, additional suspect sites were identified and addressed. With this change request, the parties propose to include thirty-six of these additional sites in the 100-IU-3 Operable Unit. The sites proposed for inclusion are shown in the attached table.

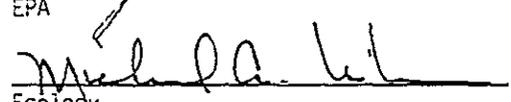

Impact of Change

The sites have already been investigated and, as appropriate, remediated through independent action taken by DOE in concert with Ecology and EPA. Approval of this change request will include the sites in the 100-IU-3 Operable Unit, allowing for formal tracking.

Affected Documents

Reports and submittals made during the 100-IU-3 investigation and remediation already include these sites. Some but not all of the sites are already included in the Hanford Site Waste Information Database System. This database will be updated to include the others.
