1 6.2.3 Return Land to the Appearance and Use of Surrounding Land

2
3 In accordance with WAC 173-303-610(2)(a)(iii), the owner or operator of a
4 TSD unit is required to close the unit in a manner that returns the land to
5 the appearance and use of surrounding land areas to the degree possible given
6 the nature of the previous dangerous waste activity.

7
8 When closure of the 218-E-8 Demolition Site is accomplished, the
9 site will be returned to the appearance and continued use of the
10 surrounding 200 East 218-E-8 Borrow Pit.

11 12 13 6.3 OVERVIEW OF CLOSURE ACTIVITIES

14
15 The activities presented in this section are divided into planning
16 activities and physical activities.

17 18 19 6.3.1 Planning Activities

20
21 The DQO planning process was used to ensure that the performance
22 standards are met to the satisfaction of all parties involved. This DQO
23 process provided the framework for the SAP and defined the data needs and
24 uses. The SAP provides the documentation of agreement and decisions regarding
25 establishing and meeting the action levels for the 218-E-8 Demolition Site
26 Closure (Appendix 7C).

27 28 29 6.3.2 Physical Activities

30
31 The general closure activities are as follows.

- 32 • Perform radiological survey (completed in 5/92).
- 33 • Collected soil samples from within the 218-E-8 Demolition Site.
34 Sample locations and collection methods are discussed in Chapter 7.0,
35 Section 7.2.3 and the SAP (Appendix 7C) (completed in 6/94).
- 36 • Analyze samples in accordance with EPA-approved procedures and
37 evaluate results. Samples will be analyzed in an offsite laboratory
38 capable of performing to EPA Analytical level III standards.
- 39 • Compare analytical results to action levels to determine the extent of
40 contamination and to determine the presence or absence of
41 contaminants.
- 42 • If contamination levels for all constituents of concern are below
43 their action levels, the 218-E-8 Demolition Site will be clean closed.
- 44 • If contamination at the 218-E-8 Demolition Site is above the action
45 level, a phase two investigation will be developed. The phase two
46
47
48
49
50
51

1 investigation will be developed in a subsequent DQO negotiation
2 process with all parties involved.
3

4 All equipment used in performing closure activities will be
5 decontaminated or disposed at a RCRA-compliant facility.
6

7 Closure activities will be monitored by an independent registered
8 professional engineer who will certify that closure activities were
9 accomplished in accordance with the specifications of the approved closure
10 plan.
