Summary of Discussion

The meeting opened at approximately 9:10 AM with the distribution of the prior meeting minutes. At the request of Ecology (J. Witczak), the words "if Energy wants to proceed with closure activities prior to formal approval of the plan", were added to the fourth sentence of the third paragraph in Attachment #1. The meeting minutes were changed accordingly and approved.

The next topic of discussion concerned the status of the closure plan. WHC (T. Wilczek) stated that the closure plan got held up during the signature phase within WHC. The plan should be submitted to DOE-RL this afternoon or tomorrow. WHC (F. Ruck, T. Wilczek) does not expect many comments from DOE-RL on revision 3 of the plan. All comments which were received from DOE-RL were incorporated. The closure plan is at the stage where no revisions will be required. Should DOE-RL have additional comments, WHC will address those comments appropriately and provide DOE-RL with revised pages.

Ecology (J. Witczak) stated that due to other commitments, he will not be able to look at the closure plan until March or April of this year. The 300 Area Solvent Evaporator will probably be in the November permit modification, and the 2727-S NRDWSF will go into the next modification, which will probably be June 1993. Sufficient time exists to allow for DOE-RL to polish the document.

WHC (F. Ruck) stated that WHC is planning on initiating demolition and removal this summer. WHC (S. Clifford) stated that the demolition will probably be scheduled for any time after May. WHC would like some indication from Ecology whether to proceed or to revise the schedule. Ecology (J. Witczak) confirmed that by June 1, WHC would like a letter from Ecology stating that the closure plan looks acceptable. Ecology (J. Witczak) stated that he could support that date.

There were no new formal business items. The meeting concluded at 9:30 AM.
