Attachment #1

300 Area Solvent Evaporator Closure Plan  
Unit Managers Meeting  
April 27, 1992

Summary of Discussion

The Unit Managers meeting scheduled for March 1992 was canceled at Ecology's request because of work related to issuing the Hanford Permit. The April meeting opened at approximately 12:30 p.m. with the distribution and approval of the prior meeting minutes. The prior meeting minutes for February 27, 1992 were approved and signed by all parties without modification.

Ecology expects to have completed review of the most recent version of the 300 ASE closure plan by the end of May 1992.

Sampling has been scheduled to commence June 1992, and WHC is arranging to have samples shipped to an on-site laboratory. <sup>PAK</sup> WHC would like a letter from Ecology giving approval for sampling locations and procedures.

The procedures for the thermal desorption unit should be available by the end of April 1992, and WHC expects that those procedures will be transmitted to Ecology for review prior to the next Unit Managers meeting.

The subject of concrete sampling was discussed. A determination still needs to be made on how to distinguish between inorganic constituents that were originally in the aggregate and contaminants which were introduced later.

The next 300 ASE Unit Managers meeting is scheduled for May 21, 1992.
