Larson

We have reviewed the environmental documents for the proposed project for permitting of Hazardous Waste Management activities at the Hanford Facility. For the 183-H Solar Evaporation Basins, an inactive dangerous waste management facility and the Hanford Waste Vitrification Plant (HWVP).

These proposals are located within the Hanford reservation and should not impact or affect the state transportation facilities in the area.

We do not any further comments to provide. Thank you for the opportunity to review and comment on this project.

Very truly yours,

RICHARD L. LARSON, P.E.  
District Administrator
