Re: Transmittal of 100 Area Feasibility Study Phase 1&2

Dear Mr. Goller:

The U.S. Environmental Protection Agency (EPA) is concerned that the U.S. Department of Energy (DOE) has failed to transmit the 100 Area Feasibility Study Phase 1&2 in a timely fashion.

A review of past correspondence shows that all comments regarding the document were agreed to by April 21, 1993. Under the Tri-Party Agreement the DOE has 30 days to incorporate the comments into the document. Given this schedule the document should have been delivered to the regulators in late May or early June.

As per discussions with you, EPA is aware the DOE has the revised document and is delaying distribution to the regulators due to concerns over information related to river sediments. The EPA requests DOE transmit the document to EPA within 10 days. Together, the three parties can review and work on any areas of the document that require refinement.

If you have any questions or concerns regarding this matter feel free to contact ~~me~~ (509) 376-8631.

Sincerely,

*Dennis Faulk*
