Attachment #1

2727-S NRDWSF
Unit Manager Meeting
Meeting Held October 26, 1992

Summary of Discussion

Review, Amend, Approve and Distribute Prior Meeting Minutes: The meeting minutes for July 23, 1992, were reviewed and signed. The Unit Managers affirmed that no Unit Manager Meetings were held in August and September 1992 by mutual consent. Robert E. Cordts was introduced as the temporary Ecology Unit Manager to replace Joseph Witczak.

Closure Activities Status: RL/WHC stated that all planned remediation has occurred and dangerous wastes generated during this activity were shipped to Grassy Mountain Landfill in Utah for disposal. Verification sampling data has not yet been validated.

Once the data is validated, the raw data will be supplied to Ecology. RL/WHC will prepare a Data Summary Package to include a summary of the sampling data and conclusions derived therefrom. A short discussion concerning sampling data quality followed. RL/WHC stated that the level to which the sampling data will be validated is based on WHC Data Quality Objectives (DQOs).

Action Item: RL/WHC will give a presentation on the data quality objectives (DQOs) at the next Unit Manager Meeting.

RL/WHC is preparing a letter concerning the concrete appurtenances discovered during remediation to 2727-S. Information regarding the discovery will be processed and transmitted to the CERCLA Operable Unit Manager in accordance with Tri-Party Agreement requirements.

If sampling data results indicate that the site may be clean closed, a letter recommending this action will be sent to Ecology for their concurrence.

If 2727-S is clean closed, RL/WHC plans to level the site.

New Business: Ecology stated that the draft permit language has been sent to RL/WHC. Ecology requested that any information or questions regarding permit conditions be supplied to them.

The next Unit Manager Meeting was scheduled for November 24, 1992, in Richland, Washington.
