Re: 100-IU-1 Soil Remediation

Dear Mr. Goldberg:

The U.S. Environmental Protection Agency (EPA) has completed it's review of the information provided on the 100-IU-1 diesel contaminated soil and concur with the U.S. Department of Energy that the soil has been bioremediated to levels below the Model Toxics Control Act level of 200 parts per million for diesel.

If you have any questions feel free to contact me at (509)376-8631.

Sincerely,

  
Dennis Faulk  
Project Manager
