Dear Mr. Mecca:

Re: Approval of B-Plant Endpoints Document Revision 2

The Washington State Department of Ecology (Ecology) has completed its review of B Plant End Points Revision 2, HNF-SD-WM-TPP-054. Ecology understands that Revision 2 is a living document and will change as deactivation and decommissioning of B-plant progresses and the end points are closed out.

Ecology is approving Revision 2 as currently written. Changes to the document pertaining to mixed waste, beyond those incorporated through implementation of Engineering Control Notice number 645519, dated September 16, 1997, will require separate Ecology review and approval.

If you have questions or concerns, please contact me at (509) 736-3012.

Sincerely,

Ted A. Wooley, B Plant/WESF Project Manager
Nuclear Waste Program
