Dear Messrs. Wagoner, Hatch, Liedle, and Madia:

Re: Transmittal of Attachment 27 to the Dangerous Waste portion of the *Hanford Facility Resource Conservation and Recovery Act (RCRA) Permit*.

This letter transmits Attachment 27 to the Dangerous Waste portion of the *Hanford Facility Resource Conservation and Recovery Act (RCRA) Permit Revision 4A*. The following six changes are incorporated into this revision: 48641

1. 300 Area Waste Acid Treatment & Storage Unit RCRA Closure Plan is moved from Mod D (1998) to Mod E (1999);
2. The Double Shell Tank System RCRA Part B permit application is moved from Mod E (1999) to Mod F (2000);

3. The 1325-N liquid Waste Disposal and 1301-N Liquid Waste Disposal RCRA Closure Plans are moved from Mod E (1999) to Mod D (1998);
4. A RCRA Closure Plan will be issued by the permittees for the Transuranic Storage and Assay Facility in Mod E (1999) instead of a RCRA Part B Permit Application;
5. The Low-Level Burial Ground RCRA Part B Permit application is moved from Mod C (1997) to Mod D (1998); and
6. The 222-S Laboratories RCRA Part B permit application is moved from Mod E (1999) to Mod F (2000)

Incorporation of the 222-S Laboratories RCRA Part B has been delayed because the Washington State Department of Ecology (Ecology) has not received a draft permit application from the Permittees by the end of March as agreed. To meet the amended schedule, the Permittees must submit a revised part B permit application to Ecology by August 31, 1998.

If you have any questions or comments, please contact me at (509) 736-3038.

Sincerely,

Laura J. Cusack, P.E.
