Change Title REASSIGNMENT OF WMUs FROM THE 300-FF-2 OPERABLE UNIT TO THE 100-IU-6 OPERABLE UNIT

Description/Justification of Change

The 600-23 and JA Jones #1 Waste Management Units (WMUs) were formerly identified in the 300-FF-2 Operable Unit. These WMUs are listed in the *Limited Field Investigation Report for the 300-FF-2 Operable Unit* (DOE/RL-96-42), but are not going to be included in further 300-FF-2 planning activities. This change will reassign the WMUs to the 100-IU-6 Operable Unit. This reassignment has been initiated due to the difference in anticipated land use (and therefore the level of remediation required) between the 600-23 and JA Jones #1 WMUs and the rest of the 300-FF-2 Operable Unit waste sites. The 300-FF-2 Operable Unit will be cleaned up to an industrial level while 100-IU-6 will be cleaned to a rural residential standard. The 600-23 and JA Jones #1 WMUs are located outside the area classified as industrial, have similar contaminants as 100-IU-6, and are of similar contaminated waste material (e.g., construction debris).

In addition to these two sites another site, UPR-600-11, will also be reassigned to 100-IU-6. This site was associated with the JA Jones #1 WMU but has been reclassified via the TPA MP-14 procedure to a "Closed Out" status. No further actions are required at this site but since it was associated with the JA Jones #1 WMU it will also be reassigned.

Impact of Change

An Explanation of Significant Difference (ESD) is being prepared to add the 600-23 and JA Jones #1 WMUs to ongoing remedial action efforts through the Plug-in Approach established in the July 1999 Interim Action ROD¹ and to notify the public of the change. The Plug-in Approach allows the selected remedy in the ROD, which was removal, treatment, and disposal (RTD) of contaminated soil and debris, to be applied to multiple similar, but separate WMUs at Hanford. Cleanup actions at WMUs that are candidates to "plug-in" to RTD can proceed under this approach without a time-consuming re-evaluation of remedial alternatives through the entire CERCLA process. The 600-23 and JA Jones #1 WMUs have been determined to be suitable candidates for this approach.

¹ EPA, July 1999, *Interim Action Record of Decision for the 100-BC-1, 100-BC-2, 100-DR-1, 100-DR-2, 100-DR-3, 100-DR-4, 100-DR-5, 100-DR-6, 100-DR-7, 100-DR-8, 100-DR-9, 100-DR-10, 100-DR-11,
