Dear Ms. Hedges:

TRANSMITTAL OF "REMEDIAL DESIGN REPORT AND REMEDIAL ACTION WORK PLAN FOR THE 100-HR-3 GROUNDWATER OPERABLE UNIT IN SITU REDOX MANIPULATION," DOE/RL-99-51, REV.1

Attached for your review and approval is the subject document. This document incorporates comments received from the State of Washington Department of Ecology on the Draft versions and Rev. 0 version of this document.

The Remedial Design Report/Remedial Action Work Plan (RDR/RAWP) provides the design and schedule for the deployment of the In Situ Redox Manipulation (ISRM) treatment barrier at the 100-D/-DR Reactors (100-D Area) within the 100-HR-3 Groundwater Operable Unit. A Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement) change request designating Tri-Party Agreement milestones for the implementation of the three phases of the ISRM barrier, as detailed in the RDR/RAWP, will be provided under separate cover.

If you have any questions, please contact me at (509) 373-9631.

Sincerely,

Arlene C. Tortoso, Project Manager  
Environmental Restoration Division
