 Lapwai, Idaho 83540

Dear Mr. Sobotta:

TRANSMITTAL OF THE REMEDIAL DESIGN REPORT AND REMEDIAL ACTION
 WORK PLAN FOR THE 100-HR-3 GROUNDWATER OPERABLE UNIT (OU) IN SITU
 REDOX MANIPULATION (ISRM), DOE/RL-99-51, REV. 1

Attached is the subject document for your information. This document has been approved by the State of Washington Department of Ecology and represents the final version of the Remedial Design Report and Remedial Action Work Plan for the 100-HR-3 Groundwater OU ISRM.

This report presents both the design and the work plan for the deployment of ISRM as the alternative selected in the Interim Record of Decision Amendment for the 100-HR-3 OU (U.S. Environmental Protection Agency, 1999) for remediation of the recently characterized chromium-contaminated groundwater plume west of the 100-D/DR Reactors (100-D Area). This plume is not within the current treatment zone for the 100-HR-3 groundwater pump and treat system as described in the 1996 Record of Decision for this OU.

If you have any questions, please contact me on (509) 373-9631.

Sincerely,

Arlene C. Tortoso, Project Manager
 Environmental Restoration Division
