Dear Mr. Foley:

Re: Approval of 200-CW-1 Operable Unit Remedial Investigation/Feasibility Study
(RI/FS) Work Plan

53609

The Washington State Department of Ecology (Ecology) approves the 200-CW-1 Operable Unit RI/FS Work Plan. Ecology notes that, while the document is approveable, certain technical review comments remain unresolved. Therefore, it is incumbent upon the U.S. Department of Energy (USDOE) to provide issue resolution within the context of subsequent primary documents.

Ecological Assessment

Ecology has previously communicated to USDOE that there is a consistent deficiency in how biological impacts are addressed in the 200 Area. The Washington State Department of Fish and Wildlife (WDFW) has previously provided comments on the 200-CW-1 Work Plan:

- letter from Jay McConnaughey, WDFW, to Bryan Foley, USDOE, 8/4/99, Re: Comments on the 200-CW-1 Operable Unit RI/FS Work Plan and 216-B-3 RCRA TSD Unit Sampling Plan 51693
- response letter from Bryan L. Foley, USDOE, to Jay McConnaughey, WDFW, 9/21/99, Re: Response to Comments on the 200-CW-1 Operable Unit Remedial Investigation Plan 51908

It is Ecology's opinion that USDOE's response is unsatisfactory. USDOE's key assertion is that "At this time, additional studies are not deemed necessary, as the information defined by the U.S. Environmental Protection Agency (EPA) in its 'Guidance for Conducting Remedial Investigations and Feasibility Studies Under CERCLA (1988)' has already been collected." Ecology has separately requested that USDOE submit a remedial investigation report containing subject information for the 200 Area as a whole. Therefore, Ecology does not withhold approval of the 200-CW-1 Work Plan. It is incumbent on USDOE to provide issue resolution within the context of the remedial investigation report.
