Subject: B Reactor

To Whom it may concern:

B Reactor has very special meaning for me and its function had great impact on me personally. In August of 1945, having survived the defeat of Nazi Germany in combat with Company K, 103 Infantry, I was the only one of the company selected to be shipped to the Asian theater for the invasion of Japan.

Enroute from Europe, I heard the news that the bombs were dropped that brought about the surrender of Japan.

Those of us in the Infantry understood what the casualty price would have been in an invasion of Japanese soil.

B Reactor deserves to be maintained to show future generations what a concentrated engineering effort could achieve.

**I recommend that Alternative #3 be selected.**

GEORGE (GREG) GREGER
