

ADDENDUM

**Nuclear Waste Program
Environmental Checklist Staff Comments**

DATE: June 7, 1995

PROJECT: 304 Concretion Facility Closure

RESPONSIBLE

OFFICIAL: Mike Wilson, Program Manager

STAFF

CONTACT: Geoff Tallent, (360) 407-7112

APPLICANT: U.S. Department of Energy

RECEIVED
JUL 01 2002
EDMC

The following staff amendments, comments, and additions correspond to sections of the environmental checklist submitted by the Applicant. These amendments are attached to, and become part of the checklist.

- A.6 The reference to the Closure Plan is changed to reference DOE-RL-90-03, Revision 2A for this section and the remainder of the checklist. Closure will begin within 30 days after approval of the Closure Plan by incorporation into the Hanford Facility Permit, and will be completed within 180 days.
- A.10 Reference to WAC 173-303-400 and 40 CFR 265 subpart G, are changed to WAC 173-303-610 and 40 CFR 264 subpart G.
- B.1.g The current plans for the 304 Concretion facility closure are to remove all buildings and pads. It is unlikely that there is sufficient soil contamination to justify leaving the pads in place. However, if dangerous waste contamination is greater than anticipated, or there is radiological contamination that must be covered, the pads may be left in place pending remediation of the soil under the corresponding CERCLA Record of Decision.

**STATE ENVIRONMENTAL POLICY ACT (SEPA)
ENVIRONMENTAL CHECKLIST FORMS**

FOR

304 CONCRETION FACILITY

RCRA CLOSURE PLAN

REVISION 1

OCTOBER, 1991

**WASHINGTON ADMINISTRATIVE CODE
ENVIRONMENTAL CHECKLIST FORMS
[WAC 197-11-960]**

A. BACKGROUND

1
2
3
4 **1. Name of proposed project, if applicable:**

5
6 RCRA Closure of the 304 Concretion Facility.

7
8 Information contained in this State Environmental Policy Act (SEPA)
9 Checklist pertains only to the portion of the Hanford Site 300 Area which
10 contains the 304 Concretion Facility.

11
12 **2. Name of applicants:**

13
14 U.S. Department of Energy, Field Office, Richland (RL); and
15 Westinghouse Hanford Company (WHC)

16
17 **3. Address and phone number of applicants and contact persons:**

18
19 U.S. Department of Energy Westinghouse Hanford Company
20 Field Office, Richland P.O. Box 1970
21 P.O. Box 550 Richland, Washington 99352
22 Richland, Washington 99352

23
24 **Contact Persons:**

25
26 E. A. Bracken, Director R. E. Lerch, Manager
27 Environmental Restoration Division Environmental Division
28 (509) 376-7277 (509) 376-5556

29
30 **4. Date checklist prepared:**

31
32 October 3, 1991

33
34 **5. Agency requesting checklist:**

35
36 State of Washington
37 Department of Ecology
38 Mail Stop PV-11
39 Olympia, Washington 98504-8711

40
41 **6. Proposed timing or schedule (including phasing, if applicable):**

42
43 A closure plan (DOE/RL-90-03 Revision 1) is being submitted for the
44 closure of the 304 Concretion Facility. The schedule for closure has not
45 been determined at this time.

46
47 Closure activities will begin when notification is received of approval
48 of the closure plan by the State of Washington Department of Ecology
49 (Ecology) and by the United States Environmental Protection Agency (EPA)
50 and will require approximately 61 weeks after approval.
51
52

- 1 7. Do you have any plans for future additions, expansion, or further
2 activity related to or connected with this proposal? If yes, explain.
3

4 Clean closure is proposed for the 304 Concretion Facility. If clean
5 closure is not practical, final disposition of the 304 Concretion
6 Facility will be determined through the Remedial Investigation and
7 Feasibility Study (RI/FS) process in conjunction with the 300 Area
8 Operable Units, 300-FF-3 and 300-FF-5, under the Comprehensive
9 Environmental Response, Compensation and Liability Act of 1980, (CERCLA)
10 and the Hanford Federal Facility Agreement and Consent Order.
11

- 12 8. List any environmental information you know about that has been prepared,
13 or will be prepared, directly related to this proposal.
14

15 This SEPA Checklist is being submitted to the Washington State Department
16 of Ecology (Ecology) concurrently with a RCRA Closure Plan (DOE/RL-90-03
17 Revision 1) for the 304 Concretion Facility. A RCRA Part A Permit
18 Application was submitted to Ecology and EPA on August 1, 1986. A RI/FS
19 and NEPA documentation are planned for the 300-FF-3 Operable Unit.
20

21 ERDA-1538 contains environmental information on radioactive waste
22 operations at the Hanford Site, including the 300 Area.
23

- 24 9. Do you know whether applications are pending for government approvals of
25 other proposals directly affecting the property covered by your proposal?
26 If yes, explain.
27

28 No applications are known to be pending.
29

- 30 10. List any government approvals or permits that will be needed for your
31 proposal, if known.
32

33 Ecology is the lead agency authorized to approve the Closure Plan for the
34 304 Concretion Facility pursuant to the requirements of Washington
35 Administrative Code, (WAC) 173-303-400 and 40 Code of Federal Regulations
36 (CFR) Part 265 subpart G.
37

38 No other permits are known to be required at this time.
39

- 40 11. Give brief, complete description of your proposal, including the proposed
41 uses and the size of the project and site. There are several questions
42 later in this checklist that ask you to describe certain aspects of your
43 proposal. You do not need to repeat those answers on this page.
44

45 The proposed project is the final closure of the 304 Concretion Facility.
46 Clean closure is proposed as the condition for final closure of the
47 facility. Clean closure is contingent on verification that all wastes
48 and contaminants are removed to accepted action levels and that all
49 equipment, structures, liners, soils and/or other materials containing
50 dangerous wastes or waste residues are removed from the 304 Concretion
51 Facility.
52

1 The facility consists of a metal building with a concrete floor, an
2 attached change room building, and an outside concrete pad surrounded by
3 asphalt. The facility covers an area of about 2000 square feet. The
4 facility is not now in use and all dangerous waste inventories have been
5 removed.

6
7 All equipment and fixtures will be decontaminated, removed, and
8 appropriately disposed of. The buildings, floors, and the concrete pad
9 will be decontaminated to appropriate action levels with one or more of
10 the following methods:

- 11 o Damp wipe downs
- 12 o Vacuum assisted mechanical removal
- 13 o Sandblasting
- 14 o High-pressure steam and suction

15
16
17 The buildings, floors, concrete storage pad and underlying shallow soils
18 will be sampled to determine the levels of remaining contamination and
19 the requirements for additional decontamination. Clean closure will be
20 achieved when sampling shows that the remaining contamination is below
21 acceptable action levels as defined in the closure plan. If
22 decontamination procedures do not meet these action levels, the
23 buildings will be decommissioned and the concrete pad demolished. The
24 building and pad will be appropriately disposed of. Any contaminated
25 soil will be remediated under the CERCLA RI/FS process.

- 26
27 12. Location of the proposal. Give sufficient information for a person to
28 understand the precise location of your proposed project, including a
29 street address, if any, and section, township, and range, if known. If a
30 proposal would occur over a range of area, provide the range or
31 boundaries of the site(s). Provide a legal description, site plan,
32 vicinity map, and topographic map, if reasonably available. While you
33 should submit any plans required by the agency, you are not required to
34 duplicate maps or detailed plans submitted with any permit applications
35 related to this checklist.

36
37 The 304 Concretion Facility is located in the northwest portion of the
38 Hanford Site 300 Area approximately one mile north of the City of
39 Richland, Washington in Section 11, T 10 N, R 28 E. A location map and
40 304 Concretion Facility plans are included in the closure plan.

41 42 43 B. ENVIRONMENTAL ELEMENTS

44 45 1. Earth

- 46
47 a. General description of the site (circle one): Flat, rolling, hilly,
48 steep slopes, mountainous, other _____.

49
50 Flat.

- 51
52 b. What is the steepest slope on the site (approximate percent slope)?
53

1 The approximate slope of the land at the 304 Concretion Facility is
2 less than two percent.

- 3
4 c. What general types of soils are found on the site (for example,
5 clay, sandy gravel, peat, muck)? If you know the classification of
6 agricultural soils, specify them and note any prime farmland.

7
8 The soil at the 304 Concretion Facility consists of compacted sand
9 and gravel fill material underlain by sandy gravel with excellent
10 drainage characteristics. No farming is permitted on the Hanford
11 Site.

- 12
13 d. Are there surface indications or history of unstable soils in the
14 immediate vicinity? If so, describe.

15
16 No.

- 17
18 e. Describe the purpose, type, and approximate quantities of any
19 filling or grading proposed. Indicate source of fill.

20
21 No fill or grading will be required for clean closure. If the
22 buildings and pad are removed, an impervious cover will be placed
23 until closure under CERCLA.

- 24
25 f. Could erosion occur as a result of clearing, construction, or use?
26 If so, generally describe.

27
28 Minor wind erosion could occur if the buildings and concrete pad are
29 removed.

- 30
31 g. About what percent of the site will be covered with impervious
32 surfaces after project construction (for example, asphalt or
33 buildings).

34
35 100% The existing buildings and pad will be left in place after
36 clean closure. If clean closure is not achieved, buildings and pad
37 will be removed and an impervious cover will be placed until closure
38 under CERCLA.

- 39
40 h. Proposed measures to reduce or control erosion, or other impacts to
41 the earth, if any:

42
43 None at this time.

44
45 2. Air

- 46
47 a. What types of emissions to the air would result from the proposal
48 (i.e., dust, automobile, odors, industrial wood smoke) during
49 construction and when the project is completed? If any, generally
50 describe and give approximate quantities, if known.

51

1 Minor amounts of dust, vapors, and vehicle exhaust will be generated
2 by vehicles and equipment during decontamination and sampling
3 activities, and by removal of the buildings and pad if necessary.
4

5
6 b. Are there any off-site sources of emissions or odors that may affect
7 your proposal? If so, generally describe.

8
9 No.

10
11 c. Proposed measures to reduce or control emissions or other impacts to
12 the air, if any?

13
14 None at this time.
15

16 3. Water

17 a. Surface

18
19
20 1) Is there any surface water body on or in the immediate vicinity
21 of the site (including year-round and seasonal streams,
22 saltwater, lakes, ponds, wetlands)? If yes, describe type and
23 provide names. If appropriate, state what stream or river it
24 flows into.

25
26 No. The closest body of water is the Columbia River
27 approximately one-half mile from the 304 Concretion Facility.
28

29 2) Will the project require any work over, in, or adjacent to
30 (within 200 feet) the described waters? If yes, please
31 describe and attach available plans.

32
33 No.
34

35 3) Estimate the amount of fill and dredge material that would be
36 placed in or removed from surface water or wetlands and
37 indicate the area of the site that would be affected. Indicate
38 the source of fill material.

39
40 None.
41

42 4) Will the proposal require surface water withdrawals or
43 diversions? Give general description, purpose, and approximate
44 quantities if known.

45
46 No.
47

48 5) Does the proposal lie within a 100-year floodplain? If so,
49 note location on the site plan.

50
51 No.
52

- 1 6) Does the proposal involve any discharges of waste materials to
2 surface waters? If so, describe the type of waste and
3 anticipated volume of discharge.
4

5 No.

6
7 b. Ground

- 8
9 1) Will ground water be withdrawn, or will water be discharged to
10 ground water? Give general description, purpose, and
11 approximate quantities if known.
12

13 Insignificant amounts of water will be discharged to the soil
14 by steam cleaning and concrete coring activities
15

- 16 2) Describe waste material that will be discharged into the ground
17 from septic tanks or other sources, if any (for example:
18 Domestic sewage; industrial, containing the following
19 chemicals; agricultural....; etc.). Describe the general size
20 of the system, the number of such systems, the number of houses
21 to be served (if applicable), or the number of animals or
22 humans the system(s) are expected to serve.
23

24 Does not apply.
25

26 c. Water Run-off (including storm water)
27

- 28 1) Describe the source of run-off (including storm water) and
29 method of collection and disposal, if any (include quantities,
30 if known). Where will this water flow? Will this water flow
31 into other waters? If so, describe.
32

33 The Hanford Site receives 6 inches to 8 inches of annual
34 precipitation. Any precipitation that occurs at the 304
35 Concretion Facility will run off the buildings and pad and seep
36 into the soil on and near the facility. No run-off will enter
37 surface waters.
38

- 39 2) Could waste materials enter ground or surface waters? If so,
40 generally describe.
41

42 Slightly contaminated runoff from the pads could enter the
43 soil during closure and is unlikely to reach the
44 groundwater. The quantity would be very minor because of
45 the dry climate and evapotranspiration from the soil. No
46 materials will enter surface waters.
47

48 d. Proposed measures to reduce or control surface, ground, and run-off
49 water impacts, if any:
50

51 None are proposed at this time.
52
53

1 4. Plants

2
3 a. Check or circle the types of vegetation found on the site.

- 4
5 deciduous tree: alder, maple, aspen, other
6 evergreen tree: fir, cedar, pine, other
7 shrubs
8 grass
9 pasture
10 crop or grain
11 wet soil plants: cattail, buttercup, bulrush, skunk cabbage,
12 other
13 water plants: water lily, eelgrass, milfoil, other
14 other types of vegetation

15 Small quantities of forbes and grasses may be seasonally found.

16
17 b. What kind and amount of vegetation will be removed or altered?

18 Small amounts of forbes and grasses.

19
20 c. List threatened or endangered species known to be on or near the
21 site.

22 None. Additional information on the Hanford Site environment can be
23 found in the environmental document referred to in the answer to
24 checklist question A.8.

25
26 d. Proposed landscaping, use of native plants, or other measures to
27 preserve or enhance vegetation on the site, if any:

28 None at this time.

29
30
31
32
33 5. Animals

34 a. Circle any birds and animals which have been observed on or near the
35 site or are known to be on or near the site:

36 birds: hawk, heron, eagle, songbirds, other:
37 mammals: deer, bear, elk, beaver, other:
38 fish: bass, salmon, trout, herring, shellfish, other:

39 Starlings, lagomorphs and pigeons have been observed at the 304
40 Concretion Facility. Additional information on the Hanford Site
41 environment can be found in the environmental document referenced in
42 the answer to checklist question A.8.

43
44 b. List any threatened or endangered species known to be on or near the
45 site.

46 The Bald Eagle and the White Pelican are sometimes seen on the
47 Hanford Site and possibly may be seen near the 300 Area.
48
49
50
51
52

1 The 304 Concretion Facility is not known to be used by any
2 threatened or endangered species. However, additional information
3 concerning endangered and threatened species on the Hanford Site can
4 be found in the environmental document referred to in the answer to
5 checklist question A.8.
6

7 c. Is the site part of a migration route? If so, explain.
8

9 No: however, the adjacent Columbia River is part of the broad
10 Pacific Flyway for waterfowl migration and other birds also migrate
11 along the river.
12

13 d. Proposed measures to preserve or enhance wildlife, if any:
14

15 None at this time.
16

17 6. Energy and Natural Resources
18

19 a. What kinds of energy (electric, natural gas, oil, wood stove, solar)
20 will be used to meet the completed project's energy needs? Describe
21 whether it will be used for heating, manufacturing, etc.
22

23 None.
24

25 b. Would your project affect the potential use of solar energy by
26 adjacent properties? If so, generally describe.
27

28 No.
29

30 c. What kinds of energy conservation features are included in the plans
31 of this proposal? List other proposed measures to reduce or control
32 energy impacts, if any:
33

34 None.
35

36 7. Environmental Health
37

38 a. Are there any environmental health hazards, including exposure to
39 toxic chemicals, risk of fire and explosion, spill, or hazardous
40 waste, that could occur as a result of this proposal? If so,
41 describe.
42

43 The 304 Concretion Facility will be clean closed by removing or
44 decontaminating all dangerous waste and waste residues to accepted
45 action levels. All proper procedures will be followed during these
46 operations to minimize exposure to hazardous waste. The potential
47 exists for exposure to hazardous waste during sampling of the
48 building and storage pad. Procedures to prevent and manage hazards
49 are presented in the closure plan.
50
51
52
53

1) Describe special emergency services that might be required.

Hanford Site security, fire response, and ambulance services are on call at all times in the event of an onsite emergency.

2) Proposed measures to reduce or control environmental health hazards, if any:

Environmental health hazards are expected to be minimal. Procedures to prevent and manage potential hazards are presented in the closure plan.

b. Noise

1) What type of noise exists in the area which may affect your project (for example: traffic, equipment, operation, other)?

None.

2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Minor amounts of noise from traffic and equipment are expected on a short term basis during day shift hours.

3) Proposed measures to reduce or control noise impacts, if any:

Vehicles and equipment will meet manufacturer's requirements for noise suppression.

8. Land and Shoreline Use

a. What is the current use of the site and adjacent properties?

The Hanford Site houses reactors, chemical separation systems, waste management facilities, and related facilities used for the production of special nuclear materials. Other scientific and engineering programs are carried out.

The 304 Concretion Facility is not currently in use.

b. Has the site been used for agriculture? If so, describe.

No portion of the Hanford Site, including the 304 Concretion Facility, has been used for agricultural purposes since 1943.

c. Describe any structures on the site.

The 304 Concretion Facility consists of a metal building, 46 feet-10 inches by 25 feet and a change room building 21 feet by 18 feet in

1 floor plan. There is a small outside concrete slab used as a
2 storage pad.

- 3
4 d. Will any structures be demolished? If so, what?

5
6 The buildings and concrete pad if necessary.

- 7
8 e. What is the current zoning classification of the site?

9
10 The Hanford Site is zoned by Benton County as an Unclassified Use
11 (U) district.

- 12
13 f. What is the current comprehensive plan designation of the site?

14
15 The 1985 Benton County Comprehensive Land Use Plan designates the
16 Hanford Site as the "Hanford Reservation." Under this designation,
17 land on the Site may be used for "activities nuclear in nature."
18 Non-nuclear activities are authorized "if and when DOE approval for
19 such activities is obtained."

- 20
21 g. If applicable, what is the current shoreline master program
22 designation of the site?

23
24 Does not apply.

- 25
26 h. Has any part of the site been classified as an "environmentally
27 sensitive" area? If so, specify.

28
29 No.

- 30
31 i. Approximately how many people would reside or work in the completed
32 project?

33
34 None.

- 35
36 j. Approximately how many people would the completed project displace?

37
38 None.

- 39
40 k. Proposed measures to avoid or reduce displacement impacts, if any:

41
42 Does not apply.

- 43
44 l. Proposed measures to ensure the proposal is compatible with existing
45 and projected land uses and plans, if any:

46
47 See answer to checklist question B.8.f.
48
49
50
51
52
53

1 9. Housing
2

- 3 a. Approximately how many units would be provided, if any? Indicate
4 whether high, middle, or low-income housing.

5
6 None.

- 7
8 b. Approximately how many units, if any, would be eliminated? Indicate
9 whether high, middle, or low-income housing.

10
11 None.

- 12
13 c. Proposed measures to reduce or control housing impacts, if any:

14
15 Does not apply.
16

17 10. Aesthetics
18

- 19 a. What is the tallest height of any proposed structure(s), not
20 including antennas; what is the principal exterior building
21 material(s) proposed?

22
23 Does not apply.

- 24
25 b. What views in the immediate vicinity would be altered or obstructed?

26
27 None.

- 28
29 c. Proposed measures to reduce or control aesthetic impacts, if any:

30
31 None.
32

33 11. Light and Glare
34

- 35 a. What type of light or glare will the proposal produce? What time of
36 day would it mainly occur?

37
38 None.

- 39
40 b. Could light or glare from the finished project be a safety hazard or
41 interfere with views?

42
43 No.

- 44
45 c. What existing off-site sources of light or glare may affect your
46 proposal?

47
48 None.

- 49
50 d. Proposed measures to reduce or control light and glare impacts, if
51 any:

52
53 Does not apply.

52

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?

None.

- b. Would the proposed project displace any existing recreational uses? If so, describe.

No.

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any?

Does not apply.

13. Historic and Cultural Preservation

- a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.

No places or objects listed on, or proposed for, national, state, or local preservation registers are known to be on or next to the site. Additional information on the Hanford Site environment can be found in the environmental document referred to in the answer to checklist question A.8.

- b. Generally describe any landmarks or evidence of historic, archaeological, scientific, or cultural importance known to be on or next to the site.

There are no known archaeological, historical, or Native American religious sites on or next to the facility. Additional information on the Hanford Site environment can be found in the environmental document referenced in the answer to Checklist question A.8.

- c. Proposed measures to reduce or control impacts, if any:

Does not apply.

14. Transportation

- a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.

Does not apply.

- 1 b. Is site currently served by public transit? If not, what is the
2 approximate distance to the nearest transit stop?

3
4 The facility is not publicly accessible and, therefore, is not
5 served by public transit.
6

- 7 c. How many parking spaces would the completed project have? How many
8 would the project eliminate?
9

10 None.

- 11
12 d. Will the proposal require any new roads or streets, or improvements
13 to existing roads or streets, not including driveways? If so,
14 generally describe (indicate whether public or private).
15

16 None.
17

- 18 e. Will the project use (or occur in the immediate vicinity of) water,
19 rail, or air transportation? If so, generally describe.
20

21 No.
22

- 23 f. How many vehicular trips per day would be generated by the completed
24 project? If known, indicate when peak volumes would occur.
25

26 None.
27

- 28 g. Proposed measures to reduce or control transportation impacts, if
29 any:
30
