**To:** Isom, Debra A (Debbi)  
**Subject:** FW: Proposed Tri-Party Agreement Changes to Status of the 216-U-12 Crib

Can't remember, did this one get into the AR? Thanks, Ron

This is a message from the U.S. Department of Energy

**EDMC**

### **Proposed Tri-Party Agreement Changes**

#### **To Status of the 216-U-12 Crib**

The U. S. Department of Energy (USDOE), the Washington State Department of Ecology (Ecology), and the U.S. Environmental Protection Agency (EPA) are the agencies responsible for the Hanford cleanup. They want your input on proposed changes to the Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement). The proposed changes are to correct the regulatory status of the 216-U-12 Crib from a treatment, storage and disposal (TSD) site to a Resource Conservation and Recovery Act (RCRA) past practice site.

#### **Background**

The 216-U-12 Crib is located in the 200 Area (Central Plateau) of the Hanford Site near the 221-U Building. The 216-U-12 Crib was built in 1960 and was operational until 1988, when the pipelines were cut and capped. The crib is approximately 15 feet deep, 150 feet long and 60 feet wide at the surface. This crib received liquid mixed waste from the 221-U Building. Currently the site consists of a backfilled trench overlain with gravel, a polyethylene barrier and soil backfill.

#### **What we are proposing**

The Hanford Federal Facility Agreement and Consent Order (Tri-Party Agreement) describes different regulatory authorities. Some waste management units on the Hanford Site were classified as treatment, storage, or disposal (TSD) units. Those units are subject to Chapter 70.105 of the Revised Code of Washington. All other waste management units are classified as past practice units. They are subject to either the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, also known as the Superfund Law) or the corrective action provisions of the Resource Conservation and Recovery Act (RCRA). The 216-U-12 crib is a hazardous waste management unit that is classified as a TSD.

In May 2005 the US DOE assembled and reviewed historical records related to the 216-U-12 crib. They also located and interviewed a process engineer who worked in the UO3 building during 1987. The interview and historical records (engineering log books, operations log books, official correspondence, a plant operating procedure, a temporary work procedure, and a work plan) demonstrate that hazardous waste was not discharged to the 216-U-12 crib after July 27, 1987. August 19, 1987 is the agreed upon date between Ecology and DOE when the mixed waste rule applies. Based on this information, the Parties propose to reclassify the 216-U-12 crib as a RCRA past practice site that is part of the larger CERCLA remedial action encompassing U-Plant cleanup.

If reclassified, the 216-U-12 crib would be addressed as part of CERCLA actions proposed for 32 other soil waste sites in the vicinity of the 221-U Building. The proposed CERCLA actions are identified in the Proposed Plan for the 200-UW-1 Operable Unit (DOE/RL-2003-24) that is available at the Hanford Public Information Repositories. The proposed action for the 216-U-12 crib would be to construct an engineered surface barrier over the crib for

11/28/2005

groundwater and human health protection, as well as ecological protection by preventing intrusion from plants and burrowing animals. Institutional controls (e.g., deed restrictions, land-use zoning, and excavation permits) would be required to minimize the potential for exposure to contamination or compromising the effectiveness of the barrier. It will be necessary to maintain institutional controls for 150 years or longer to ensure that human and biological intruders do not breach the barriers and create pathways for contamination. The State of Washington has identified no substantive differences between the proposed action under CERCLA versus the actions that would take place under RCRA requirements for closure and corrective action at a TSD.

### How you can become involved

A 45-day public comment period on the proposed changes will be held from October 5 through November 21, 2005. The agencies would your feedback on the changes proposed for the 216-U-12 Crib and will consider all comments before the changes are made final. No public meeting is scheduled at this time. To request a public meeting, call John Price, Ecology (509-372-7921) or Kevin Leary, USDOE (509-373-7285).

Please submit comments to:
