Dear Mr. Boller:

RESPONSE TO ALLEGED NOTICE OF VIOLATION DATED JULY 14, 2006

The U.S. Department of Energy, Richland Operations Office (RL) is in receipt of the subject letter regarding the Hanford Facility (EPA ID No. WA7890008967). The Environmental Protection Agency's (EPA) requested a response which provides a description of actions RL has taken or will take on this matter be issued within fifteen (15) days. We respectfully provide the following response.

On March 30, 2004, the DOE issued letter number 04-OES-0046 *Hanford Facility Resource Conservation and Recovery Act (RCRA) Permit Renewal* to both EPA and the State of Washington Department of Ecology (Ecology). The co-addressees were E. R. Skinnarland, of Ecology, and Nicholas Ceto, Program Manager of the EPA Hanford Project Office. This renewal request was issued to EPA at least 180 days prior to the Permit expiration. Pertinent portions of that renewal application are enclosed (Enclosure 1) for your convenience. The following paragraph provides a roadmap on how the March 30, 2004, application provided waste minimization information responsive to 40 CFR 264.73(b) (9).

The March 30, 2004, letter contains an enclosure titled Permit Renewal Checklists. The Permit Renewal Checklists were developed based upon an agreement with the lead regulatory agency, Ecology, to reference documents attached to the current permit, rather than reprinting them entirely for the Hanford Facility Permit renewal submittal. Within the Permit Renewal Checklists enclosure is Permit Attachment 33, *General Information Portion, DOE/RL-91-28*, where you will find *Chapter 10.0 Waste Minimization dated February 2004*. Under the Section/Requirement column of Attachment 33 you will find row D-9, *Waste Minimization* pointing to Chapters 4.0 and 10.0 as the location of the waste minimization information. Chapter 4.0, Section 4.11, Waste Minimization, references Chapter 10.0 which is provided as enclosure 2 to this letter.

JUL 27 2006

Chapter 10.0, Waste Minimization states:

“This chapter addresses the requirements of 40 CFR 264.73(b)(9). To fulfill the requirements of 40 CFR 264.73(b)(9), 'final status operating' TSD units must complete a waste minimization/pollution prevention certification annually certifying that a waste minimization/pollution prevention program is in place. A copy of this record is maintained in the Hanford Facility Operating Record, Unit-Specific files.”

This waste minimization information has not changed since RL submitted the March 30, 2004 Permit renewal letter. Enclosure 3 is the Ecology letter dated September 1, 2004, stating that the Permit application documentation is complete. Waste minimization program documentation requirements of 40 CFR 264.73(b)(9) are specifically addressed by inclusion in WAC 173-303-380(1)(q), and are the basis for Permit condition II.Z. For administrative convenience and regulatory efficiency, EPA may wish to consider adding the 40 CFR 264.73(b)(9) citation to Ecology's II.Z requirements in order to address EPA's permitting obligation at the Hanford Facility. This action may be taken in lieu of issuing a separate Hazardous and Solid Waste Amendments permit for this single item, as suggested by EPA guidance (memo, Barnes to Scarbrough, May 23, 1990[RCRA Online 13380]). We recognize however, that EPA may choose to issue a separate permit to address this area and we will be pleased to work with EPA if that choice is made.

Subsequent to receipt of your July 14, 2006, letter, we have had an initial discussion with Dave Bartus, EPA, concerning the waste minimization information issue, and we will be pleased to submit such supplemental materials as EPA may desire. We believe that the materials as discussed above may provide much of the desired information. We propose to coordinate with Mr. Bartus after he has had an opportunity to review the previously submitted materials described above, and will then provide such supplemental materials as he deems necessary.

RL looks forward to working with the EPA on waste minimization requirements and how they will be met at the Hanford Facility until such time as Ecology receives the full delegation to carry out this requirement.

Based upon the above information, we would also respectfully request that the July 14, 2006, Notice of Violation be withdrawn and this matter be re-characterized as a request for supplemental information.

We recognize that the Hanford RCRA Permit is a large and complex undertaking. Our goal is to work cooperatively with both Ecology and EPA in reissuing this complex permit.

HANFORD FACILITY RESOURCE CONSERVATION AND RECOVERY ACT (RCRA)
PERMIT RENEWAL

In accordance with Washington Administrative Code (WAC) 173-303-806(6) Reapplications, relevant documentation is being submitted for renewal of the RCRA Permit (Permit), WA7890008957. The State of Washington Department of Ecology (Ecology), the U.S. Department of Energy (DOE), and the Hanford Site contractors, as the co-operators, have worked together over the past year to establish the scope and content of this renewal application. The renewal application consists primarily of documentation maintained within the existing Permit. This renewal application consists of: (1) Permit attachments that serve as a basis for performing operations on the Hanford Site, and (2) unit-specific Permit renewal checklists that identify the location of Permit documentation within the existing Permit attachments.

The following Permit attachments, which are already in your possession, are part of this reapplication and are not contained in this package:

- HF RCRA Permit, Attachment 1, Hanford Federal Facility Agreement and Consent Order
- HF RCRA Permit, Attachment 4, Hanford Emergency Management Plan (DOE/RL-94-02)
- HF RCRA Permit, Attachment 5, Purgewater Management Plan
- HF RCRA Permit, Attachment 6, Hanford Well Maintenance and Inspection Plan
- HF RCRA Permit, Attachment 7, Policy on Remediation of Existing Wells and Acceptance Criteria for RCRA and CERCLA
- HF RCRA Permit Attachment 47, 100-NR-1 Corrective Action

Ecology letter dated September 1, 2004, "Re: Receipt of United States Department of Energy (USDOE), Resource Conservation and Recovery Act Sitewide Permit Renewal Application, dated March 30, 2004"

STATE OF WASHINGTON

Mr. Keith A. Klein
Richland Operations Office
United States Department of Energy
P.O. Box 550, MSIN: A7-50
Richland, Washington 99352

Dear Sir:

Re: Receipt of United States Department of Energy (USDOE), Resource Conservation and Recovery Act Sitewide Permit Renewal Application, dated March 30, 2004

This letter formally acknowledges the Washington State Department of Ecology (Ecology's) receipt of the United States Department of Energy's (USDOE's) application for renewal of the Resource Conservation and Recovery Act (RCRA) Sitewide Permit, which expires September 27, 2004. Ecology concurs that the package submitted is sufficiently complete per Washington Administrative Code (WAC) 173-303-840(1)(b) to begin preparing a draft permit. Any issues, questions, or concerns needing clarification will be addressed on a case-by-case basis through workshops initiated by the Ecology unit manager. For any other issues that occur, the USDOE and contractor staff are encouraged to discuss any matter affecting the unit that they represent with the appropriate Ecology unit manager.

Per WAC 173-303-840, the decision making process for permit issuance is labor intensive, and given outstanding issues related to this USDOE site, could take an extended period of time. WAC 173-303-830 states, "During any revocation and reissuance proceeding, the permittee must comply with all conditions of the existing permit until a new final permit is reissued." Ecology's expectation, therefore, is that the USDOE Hanford site will continue to operate under the current RCRA Sitewide Permit, until a new permit is in effect.

If you have any questions regarding the above information, please contact me at (509) 372-7894.

Sincerely,

Greta P. Davis
RCRA Sitewide Permit Coordinator
