1.			(See Attached)				
2.							
3.			T18 = Detonation				

## V. COMMENTS

Due to their age and method of storage, the chemicals described on this report were determined (through process knowledge), to be reactive and potentially shock sensitive. For safety reasons, the chemicals were transported in a trailer mounted bomb containment vessel to a Department of Energy-Richland Operations site permitted for treatment of shock sensitive chemical waste through detonation. The transportation vehicle was operated by the Richland Police Bomb Squad. Vehicle traffic during the transfer was controlled by site security personnel (transfer was performed during a low traffic time period). Ambulance and Fire Department units were present during the operations. The bomb squad detonated the suspect chemicals using high explosives. The chemicals were not from an off-site generator.

## VI. CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
