SUBJECT: Copies of Documents Re: HGP Lease

As I promised in our phone conversation the other day, attached is a copy of the HGP lease that terminated on December 31, 1992 and a letter agreement that extended the lease to June 30, 1993. From these you can see that the lease has terminated and control over the land has returned to RL. We are still discussing details of who will be responsible for what cleanup/D & D activities between WPPSS and RL, but these discussions will not affect the permit. I believe that there have been some discussions with the Kennewick Office about including the HGP in one of the Operable Unit Work Plans. As soon as I have more information I will let you know.
