William G. Cochran was professor emeritus of statistics, Harvard University, at the time of his death in 1980. He served formerly on the faculties of Johns Hopkins University, North Carolina State University, and Iowa State University. He was a member of the National Academy of Sciences and of the American Academy of Arts and Sciences; he held honorary LLD degrees from Glasgow University and Johns Hopkins University. He was past president of the International Statistical Institute, the American Statistical Association, the Institute of Mathematical Statistics, and the Biometric Society. His writings include many research papers in professional journals and the books Sampling Techniques, 3rd ed., 1977, and Experimental Designs (with Gertrude M. Cox), 2nd ed., 1957.

Before his death in 1974, George W. Snedecor was professor emeritus of statistics, Iowa State University, where he taught from 1913 to 1958 and where he was for fourteen years director of the statistical laboratory. His writings include a body of scientific journal articles, research bulletins, and books, including Correlation and Machine Calculation (with H. A. Wallace) and Calculation and Interpretation of Analysis of Variance and Covariance. He held a master of science degree from the University of Michigan and honorary doctor of science degrees from North Carolina State University and Iowa State University. He was a member of the International Statistical Institute, past president of the American Statistical Association, and an honorary Fellow of the British Royal Statistical Society. He served also as consultant, Human Factors Division, U.S. Navy Electronics Laboratory, San Diego, California.

The publisher gratefully acknowledges the help of David F. Cox, professor of statistics, Iowa State University, in completing the remaining authorial work on the seventh edition after the death of William Cochran and coordinating the work on the eighth edition.
