Change Title
 Expansion of Hanford Facility Waste Management Capacity Due to the Discontinuation of Process Operations

Description/Justification of Change

Add new Section 6.3.4 to the Hanford Federal Facility Agreement and Consent Order Action Plan:

Section 6.3.4, "Expansion of Hanford Facility Waste Management Capacity Due to the Discontinuation of Process Operations"

Many Hanford Site operations include systems that use chemical materials and/or solutions to perform required functions. When these systems are permanently removed from service, the chemical materials and/or solutions that no longer have a use may be considered a waste subject to the provisions of the dangerous waste regulations. For those systems that contain chemical materials and/or solutions that are considered waste, the components of the systems that contain this waste become subject to the Resource Conservation and Recovery Act (RCRA) permitting requirements of the Washington Administrative Code (WAC) 173-303 if the waste is managed for greater than 90 days. For facilities that have received a shut-down notice (facilities being transitioned), these system components (e.g., tanks and ancillary equipment) may be added to the Hanford Facility RCRA Dangerous Waste Part A Permit without providing notification required by WAC 173-303-281, provided that these components have no further waste management mission prior to RCRA closure or deactivation as addressed in Section 8.0.

Impact of Change

This change will result in time and cost savings realized through the reduction of document preparation associated with expanded waste management activities at facilities transitioning to closure.

Affected Documents

Hanford Federal Facility Agreement and Consent Order, Action Plan, Section 6 and Hanford Facility Notice(s) of Intent.
