Meeting Summary and Summary of Discussions and Commitments
303-K Mixed Waste Storage Facility and 304 Concretion Facility
Unit Manager's Meeting

1. The NOD response tables are due October 5, 1990.
 2. Ecology asked if DOE was still planning to try to clean close the 303-K building. WHC responded that it is hoped that clean closure of the 303-K building is still a viable option. Ecology requested information on the cost-effectiveness of clean closing the building versus demolition and disposal, and construction of a new building. Ecology feels that these are appropriate considerations for their evaluation of the closure plan, because they have been told that certain things could not be accomplished due to budget restraints. DOE responded that this is part of managing the facility and may not be Ecology's role. Ecology agreed, and indicated that they would like to see this information for informational purposes only. DOE will review what information is available for Ecology to review on the cost effectiveness of the clean closure option for 303-K building.
 3. DOE and Ecology agreed to keep the meetings for 304 and 303-K together at this time.
 4. Ecology expressed concern, based on previous permit applications, that the lack of specific language used the NODs may result in closure plans which do not meet requirements. To avoid this problem, Ecology will be asking for ^{interim} some interim language to NOD responses in order to be able to provide guidance. Ecology expressed interest in working closely with DOE/WHC during the resolution of the NODs to avoid any problems in the future. It was agreed that the Unit Manager Meetings will be a forum for discussing and agreeing on the appropriate language for the NODs.

Action Item #1 : The NOD responses to Ecology comments will be sent to Ecology by October 5, 1990. Action DOE/WHC
