

Decision Makers,

It is imperative that Hanford be cleaned up as soon as is humanly possible. The cleanup timetable should not be delayed it should be accelerated. We must accept the hazardous nature of the Hanford site and commit the funding to clean it up - paying for it from increased taxes on the wealthy - as it once was 50 yrs ago. In addition, no more waste should be added to Hanford until it is cleaned up first. "To get out of a hole, first stop digging"

- Sophocles (!?)
