SUBJECT 6652-C Underground Storage Tanks and Neptune Trident				

SUMMARY Mr. Poe was involved in the construction of the addition to building 6652-C. He said that he was not aware of any Underground Tanks at the construction site. That it was not known if tanks were located there. If tanks were there, they were not removed and would be there still.

Mr. Poe didn't know the origin of the neptunes trident, however after looking at the aerial photo of the trident, he said that the design was very similar to the wastewater discharge cribs that were constructed in other portions of the Hanford site.
