Re: 1) Controls for New Source of Toxic Air Pollutants
2) Notice of Construction for Hanford Projects

Dear Mr. Wisness:

This letter is a formal notification of two issues regarding air pollution control at the Hanford Site.

First, I would like you to be aware that Chapter 173-460 WAC, Controls for New Source of Toxic Air Pollutants, has become effective as of September 18, 1991. For your information and actions, I am enclosing a copy of this regulation.

The second issue is the "notice of construction" required by WAC 173-400. Any project proposed by the Department of Energy at the Hanford Site requires the submission of a notice of construction (NOC) to an air pollution control body activated pursuant to Chapter 70.94 RCW that has jurisdiction over the subject source. This means Ecology must approve the NOC prior to the construction and installation of a new or modified hazardous waste management facility in which an emissions unit has the potential to emit any regulated pollutants or toxic air pollutants. All NOC's should be submitted to the Hanford Section for review and approval.

If you and your staff have any questions regarding the issues, please call me at (206) 459-6727 or Teddy Le at (206) 459-5611.

Sincerely,

Robert C. H. King

Robert C. H. King
Chemical Engineer
RCRA Unit of Hanford Section

Enclosure
