Richland, Washington 99352

Re: 100-BC-1 Operable Unit Interim Remedial Action Report

Dear Mr. Franco:

00998956 The U.S. Environmental Protection Agency has reviewed the 100-BC-1 Operable Unit Interim Remedial Action Report (DOE/RL-2011-49). EPA project staff at the Hanford Project Office have worked closely with the U.S. Department of Energy in the development of this document. EPA concurs with the conclusion of the report that all of the waste sites in the 100-BC-1 operable unit meet the interim action remedial action objectives. EPA project staff performed inspections for each waste site as they were completed and found that the waste sites that received active remediation have been backfilled and revegetated in accordance with the 100 Area Remedial Design Report/Remedial Action Work Plan.

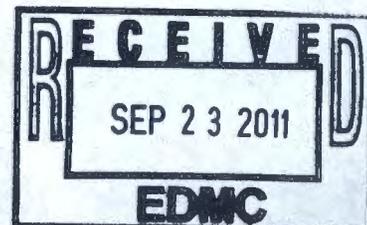

The summary of waste site remediation activities, cleanup verification processes and cost information provided in this report will support development of final remedial actions in the Hanford 100 Area National Priorities List site. The report should serve as a template for future interim remedial action reports.

If you have questions, please contact Dennis Faulk at (509) 376-8631.

Sincerely,

Daniel D. Opalski
Director
