

WASTE SITE RECLASSIFICATION FORM

Operable Unit: N/A

Control Number: 2021-020

Waste Site Code(s)/Subsite Code(s):

200-W-252, X8 Railcar Shed

Reclassification Category: Interim Final

Reclassification Status: Closed Out No Action Rejected
 RCRA Postclosure Consolidated None

Approvals Needed: DOE Ecology EPA

Description of Current Site Waste Condition:

(what is the current physical state of the site? what activities have been performed?)

Waste Site 200-W-252 is the location of the X8 demolished railcar shed. Building X8 was a wood-framed structure with transite siding, demolished in November 2010. A sitewide review in 2012 identified the location as a waste site due to the potential for residual asbestos containing-material associated with transite components in the former structure.

Hanford Mission Integration Solutions (HMIS) Project L-897 is constructing a new Central Plateau Water Treatment Facility to support the Direct Feed Low Activity Waste (DFLAW) operations and future water needs for the Hanford Site. The project footprint included WIDS Site 200-W-252. On October 20, 2021, HMIS excavated the approximate 12' x 12' WIDS site to a depth of 12 to 18 inches below existing grade. No suspect asbestos-containing debris was observed during excavation or in the excavated footprint based on inspection by an asbestos-competent person.

Basis for Reclassification:

(how does the site meet the reclassification status?)

No hazardous or radioactive waste is present at the site.

Project Manager Comments:

Waste Site Controls:

	Yes	No		Yes	No		Yes	No
Engineered Controls	<input type="radio"/>	<input checked="" type="radio"/>	Institutional Controls	<input type="radio"/>	<input checked="" type="radio"/>	O&M Requirements	<input type="radio"/>	<input checked="" type="radio"/>

If any of the Waste Site Controls are checked "Yes", specify control requirements including reference to the Record of Decision, TSD Closure Letter, or other relevant documents:
